

Three® Sleeper Recliner ■

For environments that assist in the healing process.

- Versatile
- Clean architectural style
- Eclectic

Furnishing Knowledge®

■ **A comfortable, sturdy sleeping and sitting solution.**

Easy to read instructions guide the staff, guest or family member through the recline, ottoman or sleep operations.

The tilt activation lever allows for infinite recline to sleep positions.

The soft touch ottoman lever provides four position adjustability: sit, rest, TV and sleep.

The soft touch handles are ergonomically located on the upper back making it easy to guide the chair in the direction desired.

The optional Trendelenburg lever is located on both sides for the caregivers use in those unforeseen emergencies.

The rear Medcasters are strategically located at the corners and can be easily accessed for locking.

Three® Sleeper Recliner

Healthcare facilities today are increasing the number of private patient rooms to attract more patients and accommodate family and friends who want to assist in their care. KI has addressed this trend with the introduction of the Three Sleeper Recliner, an innovative product whose design flexibility makes it adaptable to a wide range of care-giving environments.

The multi-functional Three Sleeper Recliner, which comfortably supports up to 500 pounds, incorporates two full motion products in one design. It has an infinite range of recline positions for sitting and extends to a flat sleep surface that is 25" wide and 79" long to provide sleepover comfort for family and guests. The integrated ottoman articulates to four positions – sit, rest, TV and sleep – that are operated independently of the recline activation. Nursing staff can easily access a Trendelenburg option with activation locations on the rear of each arm, making this option non-handed.

Backed by a lifetime warranty, durability is also enhanced by field-replaceable seat and back cushions, an aluminum reinforced push handle, powdercoated Trendelenburg activation levers and a steel ottoman lever which is coated for infection control. With the Three Sleeper Recliner's dual function, attractive styling and its full line of options, it makes the healing process easier for patients, their loved ones and the hospital staff.
