Height Adjustable Tables

THE POWER TO
MOVE WITH YOU

Comfort Reaches New Heights

The human body wasn't meant to sit for hours on end. Standing not only allows the body to circulate blood and oxygen while regulating blood pressure, but it increases the ability to focus while combating fatigue. Supporting the increasing popularity of sit-to-stand workstations, HON Height Adjustable Table Bases deliver a healthier style of working by allowing a seamless transition between sitting and standing throughout the day. Incorporate sit-to-stand worksurfaces into any open, private or training spaces, and start promoting a healthier way to work.

RISE TO ANY OCCASION

Each base is designed to work with any brand of HON worksurface to give anyone in workstations and private offices a much-needed change of pace and posture. The 3-stage column design extends the total range beyond the typical 2-stage design. This makes the bases ideal for supporting a variety of users and work styles in breakout spaces, collaborative areas and training rooms.

CONTROL TYPES

The optional memory controller with digital display moves the worksurface to one of four preset levels, making it easier to achieve consistent worksurface heights when used in rows. The standard controller moves up and down nearly 26" to any desired height.

ADDED DEPTH

HON Height-Adjustable Table Bases are the only bases designed to accommodate HON worksurface depths from 24"D to 30"D without the need for additional components.

FROM CHAIR TO STOOL

To accommodate a variety of task chairs, café-height and counter-height stools, the frame spans heights from 23 3/8" to 49 1/4" (including the worksurface thickness).

EXPAND THE POSSIBILITIES

With the ability to support HON worksurfaces from 48"W to 78"W, HON Height-Adjustable Table Bases work however and wherever you choose.

SIT-TO-STAND

Allow workers to easily adjust their desk height throughout the day, which can help keep them active, healthy and focused.

INSTALLS IN MINUTES. LASTS FOR YEARS.

The beauty of HON Height Adjustable Table Bases is in their simplicity and durability. Each base is able to quickly and easily attach to a HON worksurface, and can even be retrofitted to existing worksurfaces. The tubular steel frame and motor have met rigorous testing standards that double the BIFMA weight standards to ensure a high performance work environment for years to come. Backed by the HON Full Lifetime Warranty, you can rest assured that your investment is guaranteed to pay off.
